AI@MEDIATORS

ABOUT AI@MEDIATORS

AI@Mediators is an Erasmus+ project dedicated to creating a digital program that leverages AI and other digital learning tools to prevent and combat cyberbullying. Our mission is to support teachers, school leaders, and educators in their efforts to tackle cyberbullying, while also informing and collaborating with stakeholders and representatives of political and educational institutions. The project's ultimate goal is to promote policies and pedagogical content that can be integrated into school curricula to more effectively identify and regulate cyberbullying.

OBJECTIVES

The core objective of AI@Mediators is to create a safe online environment for students of secondary education. By developing an AI-powered system capable of detecting and responding to cyberbullying, we aim to discourage such behaviors from occurring. The project also seeks to provide victims with AI-based support, giving them a resource to turn to in times of need.

KEY KEY KEY KEY

KEY OBJECTIVES INCLUDE:

- Studying the contexts in which cyberbullying manifests.
- Developing AI-based methodologies and ICT tools.
- Creating a digital platform and app for training and support.
- Educating and training students, teachers, and other stakeholders.
- Informing political and educational institutions to help shape effective policies.

KICK-OFF MEETING IN ALICANTE

The AI@Mediators project will officially kick off with a meeting in Alicante, Spain, on July 11-12, 2024. This event will gather project partners to:

- Get to know each other face-to-face
- Discuss about the project's progress and results
- Define the next steps and deadlines

Project No: 2023-1-ES01-KA220-SCH-000160237

Co-funded by the European Union

PROJECT RESULTS

1 ANALYSIS OF ETHICAL AND LEGAL ISSUES:

- A comprehensive guide on policies and protocols for the ethical use of AI in education.
- Best practices for using AI in a way that respects privacy and adheres to ethical standards.
- An evaluation framework to assess AI's role in education, focusing on privacy, ethics, and EU values.
- Guidelines for using AI to detect and support teenagers experiencing cyberbullying.

2 DIGITAL EDUCATIVE PLATFORM:

- A website to enhance cyberbullying awareness among teens and parents, and foster a supportive community.
- Didactic units to educate youth on identifying and preventing cyberbullying.
- MOOCs for students and teachers to provide comprehensive knowledge and skills for cyberbullying prevention.

3 AI TOOLKIT

- An AI-powered self-assessment chatbot to help students identify potential instances of cyberbullying and understand acceptable online behavior.
- An app/game designed for both students and teachers to improve awareness, provide support, and foster community standards for preventing cyberbullying.
